

Can we trust AI to make Moral Decisions?

Researchers:

Introduction

Increasingly AI is being used to make decisions for individuals and society. This has raised many questions about whether AI is trustworthy.

Objective

The aim of this project is to determine if we can trust AI to make Moral decisions. We hope to discover what ethical framework AI uses as the basis for decision making and decide for ourselves if AI is trustworthy.

Methodology

We are going to ask an AI chatbot about the following moral dilemma.

Results/Findings

Record the discussion with an AI bot.

Discussion

Answer the following questions

- Q1. How did your group decide to resolve the moral dilemma before you asked the AI?
- Q2. How was the response from the AI chatbot similar or/ different.
- Q3. Based on the answer of the AI chatbot do you think it is trustworthy or untrustworthy? Explain your answer.
- Q4. Do you think the AI could be dangerous for society? How?
- Q5. What kind of roles do you think AI could be trusted to preform? *For example: Surgeon, Prime Minister, Police, Teacher?*

Conclusion

Can AI be trusted to make moral decisions?

Arguments For

Arguments Against

Conclusion:
